PROJECTS

Portfolio Website
I've created a portfolio website using React, highlighting some of the work, skills & other aspects of a profile.

Grocery Store
Developed a functional website using HTML, CSS, and JavaScript.

Food Delivery App
A classic food delivery website where users can order from different categories and filter the category they like.

E-Commerce Store
Developed E commerce store to sell clothes online using React and Firebase

Stopwatch
Created in React, the application allows users to start, stop, and reset.

Digital Clock
Developed a real-time digital clock application using React, showcasing real-time data handling.

Event Management System
This system is built with Java, JSP, Servlet, and a database offers user-friendly event creation.

Apartment Management System
This system is built with 3-tier Architecture and Based on Web with tech stack of C#.

EDUCATION

National University of Modern Languages, Islamabad
02/2022 - Present
Bachelors in Computer Science
CGPA - 3.01/4.0

SUMMARY

A NUML Islamabad student, seeking opportunities within web-based technology to gain invaluable industry experience. Eager to work for an organization as an intern, aims to learn the inner workings of professionals and companies, and to understand the corporate work structure for the future. With a foundation in React, HTML, CSS, and JavaScript, I am keen to contribute to dynamic projects and collaborate with professionals to enhance skills and knowledge in web development.
